

QR BASED ATM WITH MOBILE APP

QR based ATM is used to withdrawal the money in ATM. The main purpose is to overcome the ATM card .

The QR will be provide in mobile app which is official bank application.

QR code will contain encrypted user information so no one can read user information with normal QR scanner.

ADVANTAGES:-

- Time save for waiting for new ATM card when apply for another one .
- ATM making cost will be saved.
- No third party application will be needed.
- Reduce the ATM card form the user who use more than one ATM card for single user

DISADVANTAGES:-

- Need smartphone for every user with internet
